Table (1) for tubes with required delivery condition +C e +LC; for tubes with delivery condition +A, +SR and +N, the tolerance ranges noted in the table must be multiplied by the numbers noted in the following table (2)

Ratio WT/OD	The tolerances noted in the table above must be multiplied by the following factors
≥ 0.05	1
$0.025 \leq \text{WT/OD} < 0.05$	1.5
< 0.025	2
